

## ANANT LAGHANE

### Software Developer

Phone no: +91 9511928295

Email: [anantlaghane@gmail.com](mailto:anantlaghane@gmail.com)

<https://anant-laghane-vg0a.onrender.com>

To leverage my skills as a Full Stack Developer in a dynamic organization where I can contribute to innovative projects while continuously growing and enhancing my technical expertise

### Skills:

- **Front-end technologies:** Angular, TypeScript, HTML5, CSS3, JavaScript, Bootstrap
- **Back-end technologies:** Spring Boot, Java, Hibernate, REST APIs, Microservices
- **Database:** SQL Server, MySQL
- **Tools:** Ionic Framework, Taiga-UI Library.
- **Additional:** Responsive web Design, Cross-browser Compatibility

### Work Experience:

**Stezier Technology Consulting Pvt. Ltd.** – Full Stack Developer (Angular Developer)

July 2024 – Present

**Vibrant Minds Technologies Pvt. Ltd.** – Java Developer Trainee

August 2023 – July 2024

**Thetavega Pvt Ltd.** – Angular Developer

January 2023 – August 2023

### Job Responsibility:

- **Front-end Development:** Designed and implemented responsive user interfaces using Angular, TypeScript, and JavaScript.
- **Back-end Integration:** Developed REST APIs and business logic using Spring Boot and Java, ensuring seamless integration with databases like SQL Server and MySQL.
- **Database Management:** Handled database design, optimization, and data security, focusing on efficient query execution.
- **Cross-Browser Compatibility:** Ensured website functionality across different browsers and devices through thorough testing and debugging.
- **Collaboration:** Worked closely with cross-functional teams to gather requirements and deliver high-quality applications.
- **Responsive Design:** Implemented mobile-first designs to enhance user experiences on various screen sizes.

### Projects:

#### ❖ Enterprise Resource Planning (ERP) System

**Technologies Used:** Angular, Spring Boot, SQL Server, RESTful APIs.

- Developed a full-stack **ERP system** to manage business operations, including inventory, sales, procurement, and financial reporting.
- Created modular, reusable components in **Angular** for user management, role-based access control, and reporting features.
- Integrated **SQL Server** for real-time data processing and optimized database queries for faster access.
- Secured the application using **JWT**-based authentication and role-based access controls.
- Improved operational efficiency by 40% due to automation of manual tasks and real-time reporting capabilities.

## ❖ Inventory Management System

**Technologies Used:** Angular, TypeScript, Spring Boot, MySQL, Bootstrap

- Developed a full-stack **Inventory Management System** to automate stock tracking, order management, and supplier coordination for a retail business.
- Designed and implemented responsive, user-friendly dashboards using **Angular** and **Bootstrap** for real-time stock monitoring.
- Built **REST APIs** with **Spring Boot** to facilitate seamless data exchange between the front-end and back-end.
- Integrated **role-based authentication** using **JWT**, allowing secure access to different user roles (admin, manager, staff).
- Managed and optimized inventory data storage using **MySQL**, ensuring efficient data retrieval and security.
- Reduced manual stock tracking errors by **50%** and improved purchase order processing efficiency by **40%**.

## Educational Qualification

2023	Master of Computer Application Jawaharlal Nehru Engineering College.
2021	Graduate in BCA (Science) from Hi-tech college of computer & Management
2017	H.P.L. Sec.& H. Sec. Krushnapur High School (HSC board)
2015	SSC from Chhatrapati Sambhaji Vidyalaya (SSC board)

## Personal Detail:

Name: Anant Kailash Laghane

Date of Birth: 05/12/1999

Gender: Male

Languages: Marathi, Hindi, English

Address: Pune, Maharashtra, 411052

Date:

Place: Pune
